John,

the Operator submitted a bond release application for Lucero Red

The bonded area will be reduced. Attached is a Google Earth image of the mine site. The two areas total 0.8 acres. The loadout by the road is 0.6 acres so a total of 1.4 acres.

The big question is the roads. What part of the roads does the BLM want in the permit boundary?

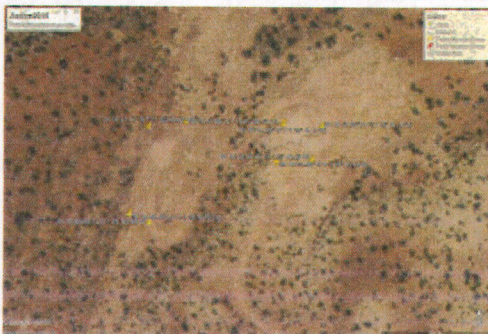

DOGM records show that the site was permitted in 2004, so many of the road are pre-mining.

Wayne

OK...sorry I didn't get back sooner, but here you go:

Roads on BLM total 0.89 acres for this operation. That's what needs to be within the permit boundary.
